# Tenas Project

## LIST OF TABLES

### PART A INTRODUCTION

#### Section 1.0 Overview of Project Proponent Description

|              |                                                                                                                                                   |         |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Table 0-1:   | Summary of Tenas Project Resources (air dried basis [adb]) – December 31, 2021, NI 43-101 and JORC Compliant .....                                | xl      |
| Table 0-3:   | Tenas Project Life-of-mine (LOM) Plan Including Construction (Years -0.5 to 0) and Operation Phases (Years 1 to 21) .....                         | xliv    |
| Table 0-4:   | Project Reserves for the Tenas Project as of December 31, 2021, with Coal Reserves Being NI 43-101 and JORC Compliant.....                        | xl v    |
| Table 0-5:   | Summary of Tenas Project Component Footprints, Project Area and Project Footprint.....                                                            | xl viii |
| Table 0-6:   | Direct, Indirect, and Induced Effects of Construction Phase on Employment (Full-time Equivalent [FTE]) .....                                      | xl ix   |
| Table 0-7:   | Number of Direct, Indirect, and Induced (Full-time equivalent [FTE]) during the Operation Phase .....                                             | xl ix   |
| Table 0-8:   | Direct, Indirect and Induced Effects of the Project on Total Wages and Salaries During the Operation Phase (in Millions of Canadian Dollars)..... | l       |
| Table 0-9:   | Number of Direct, Indirect and Induced Full-time Equivalents (FTEs) during Project Decommissioning and Reclamation and Post-Closure Phases .....  | l       |
| Table 0-10:  | Preliminary List of Federal Authorizations and Permits Likely Required for the Tenas Project.....                                                 | li      |
| Table 0-11:  | Preliminary List of Provincial Authorizations and Permits Likely Required for the Tenas Project.....                                              | lii     |
| Table 0-12:  | Summary of Alternative Means for Completing the Project.....                                                                                      | lviii   |
| Table 1.8-1: | Unit 1 Seams of Economic Interest Thickness Data in Metres (m) for Tenas Project.....                                                             | 14      |
| Table 1.8-2: | Maximum Vitritine Reflectance as a Function of Coal Rank.....                                                                                     | 30      |
| Table 1.8-3: | Geological Model Seam Codes .....                                                                                                                 | 32      |
| Table 1.8-4: | Selected Insitu Coal Quality Parameters from Composites and Geological Block Model Results (air dried basis [adb]) .....                          | 32      |
| Table 1.8-5: | Tenas Project Resource Classification Criteria .....                                                                                              | 37      |

|                    |                                                                                                                                                                                          |     |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Table 1.8-6:       | Insitu Ash and Calculated Bulk Density Values for Mineable Tenas Project Coal Seams .....                                                                                                | 39  |
| Table 1.8-7:       | Air Dried Moisture Values of Various Coal Seams .....                                                                                                                                    | 40  |
